Education

University of Mumbai

Aug 2023 – Present

B.Tech in Artificial Intelligence and Machine Learning

- GPA: 8.53/10.0
- Coursework: Machine Learning, Computer Networks, Operating Systems, Cloud Computing, Distributed Systems

Technical Skills

Languages: Python, Go, Bash, JavaScript

Cloud & DevOps: Kubernetes, OpenShift, Docker, Terraform, Jenkins, Argo CD, GitHub Actions, AWS CodeBuild

Observability & Security: Prometheus, Zscaler (ZIA, ZPA, ZCC), CVE, NVD, EPSS, CVSS

AI & MLOps: MCP, Kubeflow, KServe, AI Agents

Platforms: AWS, Linux, OpenShift, Git, Salesforce

Databases: MySQL, MongoDB

Experience

Zycus

Jun 2026 – Present

Engineering Intern

- Built a production-ready **Zscaler MCP Server** supporting **ZIA**, **ZPA**, and **ZCC**, automating enterprise security information retrieval.
- Developed an AI-powered **Vulnerability Scanner** using **CVE**, **NVD**, **EPSS**, and **CVSS** to assess software risk and recommend secure versions.
- Automated **OpenShift VM Provisioning** using **Salesforce**, **Python**, and **Golden PVC** templates, replacing a manual provisioning workflow.
- Built and deployed enterprise automation using **AWS CodeBuild** and **ArgoCD**, while contributing to AI-powered developer productivity tools.

KubeEdge

Jun 2025 – Sep 2025

LFX Mentee (The Linux Foundation)

- Contributed to **KubeEdge documentation** by updating version-specific installation guides and troubleshooting resources.
- Built an **ARM64 simulation architecture** to validate **CloudCore/EdgeCore** deployments before testing on physical **RK3588** hardware.
- Explored **RK3588**, **AI inference**, **NPU workloads**, and **edge computing** while debugging edge-cloud communication and performance.
- Collaborated with mentors from the **Linux Foundation** and the **KubeEdge** community, strengthening open-source and cloud-native engineering skills.

Hashnode

Mar 2025 – Present

Technical Writer

- Published technical blogs on **Kubernetes**, **Docker**, **Go**, and **AWS**.
- Created hands-on tutorials covering **KubeEdge**, **K3s**, and other **CNCF** technologies.

Projects

ModelForge: End-to-End MLOps Platform with Kubeflow

[github](#) [🔗](#)

- Built an end-to-end **MLOps platform** on **Kubernetes** using **Kubeflow**, enabling automated model training, experimentation, deployment, and inference.
- Integrated components such as **Kubeflow Pipelines**, **Katib**, and model serving to streamline the machine learning lifecycle with reproducible workflows.
- Tools: Kubeflow, Kubernetes, Docker, Python, ML Pipelines

KubeJournal: Kubernetes Cluster Log Collection

[github](#) [🔗](#)

- Developed a **Go-based** Kubernetes log collection utility to retrieve and centralize **node-level logs** across clusters for easier troubleshooting.
- Leveraged **DaemonSets** to collect logs from every Kubernetes node, simplifying observability and debugging in distributed environments.
- Tools: Go, Kubernetes, DaemonSets, Linux

GitOps CI/CD Pipeline with Jenkins & ArgoCD

[github](#) [🔗](#)

- Designed a **GitOps CI/CD pipeline** integrating **Jenkins** and **ArgoCD** for automated Kubernetes deployments.
- Implemented **SonarQube**, Docker image builds, auto-sync, and rollback mechanisms to improve deployment reliability.

- Tools: Jenkins, ArgoCD, Docker, SonarQube, Kubernetes

Activities/Achievements

- **Speaker at KubeCon + CloudNativeCon India 2026** – Presented a [talk](#) at a **prestigious Cloud Native conference**, “Validating RK3588 for KubeEdge: Scalable ARM64 Edge Node Simulation Without Hardware”.
- **Speaker at CNCF Thane** – Delivered a session on **WebAssembly in Cloud Native Ecosystems**, highlighting its role in portability, performance, and secure edge computing.
- Reported a valid **local path traversal vulnerability** in **AWS SAM CLI**, acknowledged by the AWS Security team as part of their **bug bounty program**.
- **Active in Cloud & DevOps Communities** – Regularly participate in **GDG Cloud**, **AWS User Groups**, and **CNCF meetups** to stay **updated** and connect with **industry experts**.
- **Kubeflow Booth Volunteer at KubeCon India 2026** – Engaged with attendees at the **Kubeflow** booth, interacted with **MLOps practitioners**, answered technical queries, and gained valuable insights into real-world cloud-native AI/ML workflows.

Certifications

Certified Kubernetes Administrator (CKA) – KodeKloud
Kubernetes and Cloud Native Associate (KCNA) – KodeKloud
KubeCon + CloudNativeCon India 2026 Speaker
AWS Knowledge: Cloud Essentials
